IRS will Pay You to become Energy Efficient!

Too good to be true?

Is the government actually doing something that will benefit me?

Since October 2008, Congress has passed three separate pieces of legislation that may help you lower your taxes while you lower your energy costs. Michigan has joined in the game as well offering additional tax credits. Some of these incentives cover qualified home improvements such as windows, insulation or heating & cooling systems, others cover electric vehicles, solar, wind and geothermal systems, and there are several business incentives as well. Review the topics that are of greatest interest to you:

1. **30% Off! Energy Saving Home Improvements**
2. **MICHIGAN will Pay You to make your home more Energy Efficient**
3. **Save Money, Save Taxes, Save the Environment - Tax Credits for Solar, Wind & Geothermal Systems**
4. **Credits for Electric Vehicles**
5. **Business Credits for Energy Efficient Equipment**
